

COMMITTEE FOR
NEW FIRE WAGONDepartment Will Urge on Council Im-
mediate Action.

The regular monthly meeting of the Winchester Fire Department was held at their rooms Friday night. Chief A. R. Baldwin presided and a good number of firemen were present.

After the routine business was transacted, the matter of purchasing a new hose wagon was discussed. It was reported that the one now in use is in a bad condition and unsafe for the firemen to ride on. The committee appointed to investigate the matter of purchasing an automobile hose wagon had little to report. Mr. Baldwin stated that he had been endeavoring for several months past to get the Councilmen to purchase a new wagon but that so far he had been unable to accomplish anything.

It is the intention of the department to get first a new wagon for the central station and then through the aid of the Council have the old one repaired and placed in the North end of the city where, owing to the growth of that end of the town, it is very necessary.

To obtain something definite from the Council and especially the fire committee, the committee, composed of W. P. Winn, James A. McCoun and John Harding, appointed at the October meeting to investigate the matter of purchasing an automobile hose wagon were directed to arrange for a meeting with the fire committee of the Council, at the earliest possible moment at the engine house, show them the old wagon and the condition it is in, see if they are willing to get a new wagon or not and report back at a called meeting next Friday night.

Of late quite a number of young men and boys who are not members of the department have been jumping on the wagons as they go out of the house to a fire, keeping firemen off and the chief ordered the drivers to stop whenever anyone not a member jumped on and put him off and stated that he would prosecute them hereafter.

There are now fifty-one members on the active list of membership.

SUPT. E. R. JONES TO
SPEAK IN WINCHESTERDate Set is Sunday, November 29,
For This City and Same
Evening at Ford.

Superintendent E. R. Jones, of Franklin, will speak in the interest of the Educational Campaign at the court house, Sunday, November 29, at 3 o'clock. He will speak that evening at Ford at 7 o'clock.

The committees for the meetings have not yet been appointed. But the program will probably be submitted for publication Monday.

Transylvania and Central Universities are playing football at Lexington Saturday afternoon.

PRIMARY IS CALLED
IN THIS DISTRICTJudge Benton and Attorney Crutcher
Are Only Announced Can-
didates.

RICHMOND, Ky., Nov. 14.—The Twenty-fifth Judicial District Committee met at the courthouse here yesterday afternoon and fixed December 31 as the date for holding the Democratic primary to nominate candidates for Circuit Judge and Commonwealth's Attorney for this district. All committeemen were present, with Chairman Hon. J. A. Sullivan, of this city, presiding, and Leslie Saunders, of Stanton, clerk.

The Twenty-fifth Judicial District is composed of Madison, Clark, Jessamine and Powell counties. Judge James M. Benton and Attorney B. R. Crutcher, of Winchester, present incumbents, have announced for reelection, and so far have no opposition.

MEETING OF COUNTRY
LIFE COMMISSIONMembers in Lexington Saturday
at the State Univer-
sity.

The Country Life Commission appointed by President Roosevelt, met in Lexington, Saturday.

Governor Willson, accompanied by State Commissioner M. C. Rankin and other State officials from Frankfort attended.

R. R. Perry, of Winchester, was also in attendance.

OLD CLARK COUNTY
MAN HERE VISITINGMr. L. G. Burris Who Left Here Fifty
Years Ago, is at Home
Again.

Mr. L. G. Burris, of Buffalo, New York, formerly of this city, is spending a few days with friends and relatives here. Mr. Burris was born and raised in this county and is related to some of the oldest and most prominent families in the county.

Mr. Burris left this county fifty years ago this month going to New York and engaging in the live stock business which he is still interested in. Mr. Burris says he is very fond of the business having been engaged in it ever since he was 17 years old.

He left this county when he was 28 years old and he is now 79 and is a man of remarkable vigor and health, considering his advanced age, which he says is due to the way that he has taken care of himself.

FIRST SNOW.

After enjoying the warm days much longer than we were entitled to, winter is at last here. The first snow of the season fell early this morning almost covering the ground.

LOT'S ESCAPE
FROM SODOMDr. J. W. Porter to Speak Saturday
Night and at Both Sermons
Sunday.

Dr. J. W. Porter, of Lexington, spoke again to a crowded house at the revival services at the First Baptist Church Friday night. His subject was, "Lot's Escape from Sodom." He will speak again Saturday night and at both services Sunday.

Rev. J. J. Porter, pastor of the First Baptist Church, will occupy Dr. J. W. Porter's pulpit in Lexington Sunday.

Dr. Porter's text was from Gen. 19:17—"Escape for thy life, look not behind thee, neither stay thou in all the plain, escape to the mountain, lest thou be consumed."

The Ancient Cities.

The ancient cities of Sodom and Gomorrah, were probably situated in the northern shore of the Dead sea. It is said that Abraham lifted up his eyes and saw the cities of the plain, which he could not have done, had these cities been at the southern end of the sea, as is claimed by some. The wickedness of these cities had become so great, that even God had lost patience with them. There is a boundary line to God's patience and mercy. The statute books of our State still attest the memory of the unspeakable sin of these cities.

The people of these cities had been given frequent warning and ample opportunity to repent. Warning is often multiplied before destruction comes. Every man and woman has had a chance. Alexander had his chance to have lived and died an honored man, but he crucified his chance and died a hopeless drunkard. Caesar had his chance, and might have lived and died loved and honored by his countrymen, but he missed his chance, and was murdered by those whose fortunes he had made. Charles Stewart Parnell had his chance to have forever lived, as the idol of Erin. He despised virtue, missed his chance and died broken-hearted and despised.

God's Voice Will Be Heard.

God's voice will be heard, even in the death-rattle, of those who hate him. The English laughed at Patrick Henry, but they heard him in the thundering of American cannon and in the groans of their dying. Loehiel, the proud Scottish warrior, refused to listen to the voice of warning, but ere the nightfall the blood of his best soldiers had stained the wild flower of the battlefields.

We may live without religion, but we cannot die without it. We may act the part of the brave in life, but without Christ we play the coward in death. No braver man than Napoleon, probably ever lived, but he shrank in abject fear in the presence of death. Turning from the tomb of this proud child of Corsica, with the memories of his life and death still upon me, I turned my steps far across the sea. As the sun was setting I stood upon a little mound at the northern gate of Jerusalem. As I gazed, with tear-filled eyes, I thought of the Man of Galilee, who had lived for others, and then died, that others might live. I see him, his hands nailed to the cross; and hear him as he sweetly murmurs in dying, "Father into thy hands I commend my spirit." Napoleon's death, is that of the man without Christ; the death of Christ, is the dying of the Christian.

As Sodom was destroyed, so shall every soul, that trusts not in the living God. There is no use to say, "I do not believe in hell." It would be better to say, "I do not believe in the Bible." We ridicule the idea of the world being burned up. As a matter of fact the world is already on fire. I have gazed upon the fires of Vesuvius, that have been steadily burning for more than two thousand years. Everlasting fire is an easy thought to one who has looked upon Vesuvius.

They were commanded not to look back. Mrs. Judge Lot, who was one of Sodom's society's leaders, looked back and was turned to a pillar of salt. It takes a good deal of salt to save the average society woman. Many look back at their habits. I would not offer you a Christ that is not greater than any habit.

Stay not in the plain of indecision. Some are halting tonight. Launch out tonight, it may be the highest tide you will ever know.

MANAGERS OF SKATING
RINKS ARE ORGANIZEDMr. D. B. Scobee, of Winchester, is
Made Treasurer of New
Organization.

The managers and owners of the leading skating rinks in Central Kentucky met at the Mammoth skating rink in Lexington Friday and organized "The Kentucky Polo, Broom Ball and Skate Racing association" and Mr. D. B. Scobee, of this city, manager of the Auditorium skating rink, was elected Treasurer of the association. The suits for the Polo and Broom ball players have been ordered and every thing has been done except arrange the schedule and picking the team. The schedule will be arranged as soon as possible but will not be put into effect until the first week in December. This is being done so as to allow each of the rinks to pick their very best material and give them a trial before organizing their teams.

Mr. Scobee at the Auditorium will pick two teams for the Broom ball and Polo and they will practice with one another and the best of the two will be chosen to represent the Winchester rink. Mr. Scobee will begin picking his teams at once and as soon as the teams are chosen they will begin practice.

There will also be a ladies' Broom ball team organized here; the Broom ball game is very fascinating and is not dangerous to play and is said to be very fine exercise.

When the teams are organized and every thing completed there will be something doing at each of the skating rinks twice a week. In addition to the races, Broom ball and Polo the association has arranged to secure the very best skating rink attractions that are on the road to exhibit at the rinks in the association.

HANDSOME RESIDENCE
NEARING COMPLETIONBut One House in the Blue Grass
Erected From Similar Ma-
terial.

The splendid expanded steel lath, concrete stucco, house with asbestos roofing which Dr. M. S. Browne is having erected on Highland street, is nearing completion. There are three floors, with bath and lavatory on each floor. The house contains seventeen rooms, with gas and electricity in each room.

The structure has the spattered ash gravel finish. The only similar building in the Blue Grass was erected in Lexington this summer, and the workmen were imported from Chicago.

Dr. Browne's structure was erected by Winchester men and is as good as the best house that is built, though the cost was considerably less than if stone had been used.

TURKEY TALK

Mr. J. D. Reese delivered to S.
Renaker and Son Friday 600 turkeys
at 13 cents per pound.

Mr. E. C. Crogan, of Lexington, is at W. C. Taylor's Stock Yards receiving turkeys for Messrs. Gilman & Company.

Mr. D. B. Hampton bought for Mr. Jake Graves, of Chilesburg, 650 turkeys, delivered Friday, at 14 cents per pound.

Two carloads of turkeys were shipped from W. C. Taylor's Stock Yards Friday to Messrs. Gilman and Company at Lexington.

Messrs. S. Renaker & Son's shipped one carload dressed turkeys Friday to Boston, Mass.

Messrs. Brookshire & Fox delivered to E. Renaker Saturday 600 turkeys.

Robert Owen delivered to E. Renaker 1300 turkeys this week.

Jas. Osborne brought 350 turkeys from mouth of Red river and sold to S. Renaker at 13 per pound.

Messrs. Toohy Bros. shipped two carloads of turkeys Saturday. One load went to Providence, R. I., and one to Boston, Mass.

GRAND DUKE DIES

Special to The News.
PARIS, Nov. 14.—Grand Duke Alexis, of Russia, uncle of the Czar, died here today of pneumonia.

ELECTION IN
CUBA TODAYPearl of the Antilles Will Vote For
President—No Trouble is
Expected.

Havana, Nov. 14.—Cuba will today follow the recent example of her big sister republic to the north in electing a president. Unlike the United States, however, Cuba has only two candidates for the office of chief executive of the island republic. The two aspirants for the presidency of Cuba are General Mario Menocal, candidate of the Conservative party, and General Jose Miguel Gomez, head of the Liberals. Their running mates are respectively Dr. Rafael Montoro and Alfred Zayas. The nomination of Senor Zayas for the vice presidency is the result of a coalition of the Miguelista and Zayasta factions of the Liberal party, the two men having formerly been bitter political foes. They have buried the hatchet, at least temporarily, in a united attempt to down the common enemy, the Conservatives.

There is no doubt that absolute fairness will characterize the election, about which every safeguard has been cast by the provisional government, in accordance with an elaborate election law framed by the advisory commission, of which Colonel Crowder is chairman. The balloting

GOVERNOR MAGOON,
Who Threw Every Possible Safeguard
Round the Election.

will be conducted with all the regard for law and order which marked the provincial elections last August. Both of the political leaders have given assurances that they will accept loyally the result of the popular verdict.

There is practically no difference in the platform of the two parties, both having as their chief planks the preservation of the republic, equal rights for all citizens, the encouragement of agriculture and commerce and the maintenance of friendly relations with the United States. The struggle is frankly for the possession of the government and the control of public patronage.

Both General Gomez and General Menocal are veterans of the revolution and have a large following in virtue of their distinguished services in the field. Dr. Montoro is the foremost orator in Cuba and was nominated in the expectation of his being able to control the large Spanish vote, but he is unpopular with many Cubans on account of his attitude during the revolution when he held office in the autonomous government in the last days of Spanish rule.

Senor Zayas is the idol of a large section of the Liberals. He was the leader of the last uprising against President Thomas Estrada Palma.

The result of the election will perhaps not be known for several days, despite the elaborate arrangements for the prompt forwarding of the returns from 1,498 polling places.

Ohican's Fatal "Leap For Life."

Monroe, La., Nov. 14.—At the Ouat-chita parish fair here, a performer, whose feat is known as "the leap for life," and consists of swinging on a rope through a sheet of flame, fell from a 55-foot derrick and was fatally injured. His home is in Marion, O., but only his last name, Bell, is known to the officials of the fair. He was brought to the city and placed in a hospital.

Auto Plant Scorched.

Stoneham, Mass., Nov. 14.—Much valuable machinery, together with nearly a dozen newly-assembled automobiles and a like number of partially completed machinery, owned by the Shawmut Motor company, was destroyed in a fire which burned the large factory plant of the company. Three tenement houses nearby were also burned. The total loss is estimated at nearly \$100,000.

ATTEMPTS GRAFT
PROBER'S LIFEFrancis J. Henry Shot Down By Sa-
loon Keeper in Crowded
Court Room.

San Francisco, Nov. 14.—Francis J. Henry, who is prominent in the prosecution of the graft cases in this city, was shot and probably mortally wounded during the progress of the trial of Abraham Ruef on the charge of bribery, by Morris Haas, who was a ventriloquist in a former trial of the graft cases.

The court had taken a recess for ten minutes and the jury had left the room. Henry and Ruef's attorneys, Ash and Dozier, had just returned from Judge Lawton's chambers where they had been summoned by the judge for a conference. After the conference Ash and Dozier entered the court room and Henry returned to his customary seat. He was talking with former Supervisor Gallagher, who had just previously undergone a severe cross examination by Ruef's attorneys, when Haas rushed up out of the audience. Haas approached Henry, placed a revolver against his right temple and fired. Henry fell over on the desk, the blood streaming from his wounds. Haas was immediately seized by bystanders and thrown into the empty jury box, where he was held on his back.

Haas was a ventriloquist in a former bribery trial and was submitted to a severe examination by Henry while he was being examined for jury duty. He asserts that the information brought out by Henry in his questions has resulted in the ruin of his business, that of a saloonkeeper.

Henry was taken to the central emergency hospital in an ambulance. Physicians say his wound is not necessarily fatal. Haas is a Jewish saloonkeeper and an ex-convict who was exposed by Henry in the second Ruef trial after he had been passed as a jurymen.

MAIL CLERK STORY

Reputed by Denver Police in Case
of Mrs. Read.

Denver, Colo., Nov. 14.—When shown a printed story to the effect that Mrs. Allen F. Read, who attempted to extort money from Mrs. Genevieve Chanler Phipps, by threatening her life with dynamite, was escorted to the American hotel on the day of her arrival in this city by a railway mail clerk named E. J. Sawyer, the police authorities denied that they were looking for such a man. The hotel people declare that Mrs. Read was unaccompanied when she appeared at the clerk's desk and wrote the name of "Mrs. H. C. Cones" upon the register.

The condition of Mrs. Read is still critical. Her intimate friends fear that she cannot recover from the shock of her arrest and the effect of the drug previously taken, upon her system, already weakened by disease.

Sawyer Denies Story.

Omaha, Neb., Nov. 14.—R. C. Sawyer, of this city, the railway mail clerk who is reported to have accompanied to a hotel in Denver, Mrs. Allen F. Read, the woman who on last Monday attempted to extort \$20,000 from Mrs. Phipps, a wealthy Denver woman, by threatening to use dynamite, denied the story. He says he has not been in Denver for a week.

PRIEST FOUND GUILTY

Of Complicity in Plot That Resulted
in Sicilian's Death.

Rutland, Vt., Nov. 14.—A verdict of guilty of complicity to commit an assault was returned by a jury against Rev. Father Francis Crociata, the Sicilian priest, who has been on trial in the superior court here this week. Father Crociata was accused of having been connected in a plot which resulted in the death of Accorito Santoro, a Sicilian, who was beaten to death by fellow countrymen because of his alleged attentions to a young Sicilian woman. Two men directly involved are serving prison sentences for their part in the affair. Sentence in Father Crociata's case was deferred.

Holds Short Session.

Denver, Colo., Nov. 14.—After a session of only an hour and a half, the convention of the American Federation of Labor adjourned. Very little has been accomplished by the convention yet and as today is a half holiday, the important matters will go over until next week.

Explosion Kills Four.

Sargent, Ky., Nov. 14.—In a boiler explosion of the Miller Lumber Company's plant at Pound, near Pound Gap, four men were killed and four more severely injured.

THE TARIFF.

Already the rumblings of the tariff war are heard. The extra session of the Congress is still five months off, but special interests are putting in their pleas for protection. In a hearing before the House Ways and Means Committee certain Democratic members favored an increase in the rate of duty on barytes.

General Hancock, when a candidate for President in 1880, suffered defeat because he said that the tariff was a local issue. But is it not true? New England and the manufacturing cities of the North for years favored a high tariff because it was believed to aid their manufactures. The South until recently had no factories and was unanimously against a tariff.

Now, there are deposits of barytes in North Carolina, Alabama, Georgia and Tennessee; there are great cotton mills in Atlanta and in Birmingham, there is beet sugar in Louisiana, there is lumber in Kentucky. We all want our particular industry protected.

But there has grown up from changed conditions great inequalities and injustices in the present tariff schedule. Gigantic fortunes have been made in favored industries. Without the high duties, Carnegie and his associates could never have accumulated their untold millions in steel. And every man, woman and child in the United States were taxed to make these multi-millionaires.

The Democratic party as a whole favors a lower tariff. The progressive wing of the Republican party has declared for a revision of the schedules. The country looks forward and expects some action at the extra session. There is only one great stumbling block in the way and that is the present Speaker. He is hand and glove with the favored interests. He will if re-elected, use his power unscrupulously to strangle every honest movement to reform the tariff. It is hinted in the dispatches that Taft may aid Congressman Burton or some other candidate in the fight against Cannon.

We believe that it would take the tremendous influence of the President to dislodge the Speaker. The majority of the Republican members of the House would probably like to see him defeated. But they are afraid to come out into the open. They know that if they vote against him in the caucus and he wins, they have committed political hari-kari; that they might "as well be at home, as far as having any influence in securing legislation.

It is to be hoped that some of the sturdy representatives from the Middle West who are pledged against him will have nerve enough to stay out of the Speaker's caucus and will refuse to vote for him, if he is the choice of that caucus.

THE BASEBALL CLUB.

The secretary of the Winchester Baseball Club tells us that, while many subscriptions have come in in answer to the letters sent out by the committee, they are still far short of

the amount necessary to incorporate. Many things have to be done to complete the organization of the club, such as signing up the players and others details.

We should all send our subscriptions in at as early a date as possible. Take anything from a single share up. The committee wants to popularize the club and therefore it would rather have ten small subscriptions than a single big one. Remember, if you are a little short of ready money, that there is nothing payable until next spring. Get in and help along.

next spring. Get in and help along. The prospects are that we will have a winning club next year and that we'll be in the running from the start. And such a club is a good advertisement for the town.

NEW FIRE APPARATUS.

At the meeting of the fire department Friday night the committee on new hose wagon was instructed to consult with the fire committee of the Council and see if something could not be done immediately to secure the needed apparatus.

We are glad to see that the fire department is moving. If there is one thing the city needs it is new fire apparatus. And the Council should wake up to its importance.

As we have said, the North end is nearly defenseless. A fire well started during a night on which the wind was blowing would sweep that section of the city. And while the boys were working there, the business and residence sections of the South end would be absolutely at the mercy of a fire.

PRINTERS.

Get Ready For the Editorial Big Stick.

The busiest place in town yesterday was the composing room of The Outlook, where Theodore Roosevelt is to serve as Special Contributing Editor after he quits the Presidency. "Hey Bill," said the foreman to his assistant, as he lifted his nose from the dusty box in which the capital letters are kept.

"What's the matter now?" asked the assistant, as he tossed a stereotype cut of the Dove of Peace out of the back window and kicked a "God Bless Our Home" motto under the desk.

"The 'M' caps; where are the 'M' caps?" cried the foreman, in accents wild. "How can we spell Malefactor with only four 'M' caps in the shop?" "We're shy on — and * * and ! ! and [] [] and ? ? ? , too," shouted the "sub" in terror, as he balanced himself on his head and squirmed under the cases.

"No double crosses, neither," hoarsely yelled the galley boy. "Where is that shorter and uglier word?" excitedly inquired the foreman. "I saw it in the box a year or so ago, all set up and ready for action. We'll need three bushels of them, in all styles of type, including italics and Roman capitals."

"Help!" cried the assistant, leaping from case to case. "We got but three T caps. The rest are little iii's to spell 'it' with."

I can see our finish if the Special Contributor hits the shop with that layout on our hands," remarked the foreman, darting for the phone. He called up a type foundry and gave the following order:

Ten thousand capital I's to spell 'I am I' with.

Three hundred pounds of exclamation points.

Ten quarts of dashes and asterisks.

Twenty-three crates of shorter and uglier words, one-half in caps, one-quarter in italics, the rest assorted. Five hundred stock cuts such as are used by patent medicine men and vendors of firearms.

One of the compositors then nailed to the wall a new motto:

HE HATH SAID IN HIS HEART ALL MEN ARE — LIARS — (BUT ME.)

"That will make the Special Contributor feel at home," he said.—N. Y. World.

WANTED—TURKEYS.

I will be in the market for your Thanksgiving and Christmas turkeys. Will receive Thanksgiving turkeys from November 6th to 17th. My office will be at W. C. Taylor & Co's. Stockyards on Broadway. Home phone No. 53. East Tenn. No. 74. Before selling get my prices.

The ladies of Allen Chapel are arranging for a grand entertainment at the Benevolent Hall on Thanksgiving night.

Rev. Taylor Rhone has been called to the pastorate of the Baptist Church at Pikeville, Ky.

Novel programme at the Hippodrome tonight.

The late Senator Vilas in his \$10,000,000 bequest to the State University of Wisconsin made provision

PRESIDENTS' LETTER

Brought Fraternity Men to Their Feet at Banquet.

New York, Nov. 14.—Concluding one of its most successful annual conventions during its existence of 62 years, the Delta Kappa Epsilon fraternity held a banquet in the grand ball room of the Waldorf Astoria that was believed to be the largest college dinner ever given and doubtless, also, never surpassed for enthusiasm.

When the good things duly had been negotiated and the cigars had been passed around, the six hundred or more diners were brought almost as one man to their feet by an announcement by Judge Vernon M. Davis, presiding officer of the banquet, of a letter from the president of the United States.

The letter was congratulatory in tone and great stress was placed on the good that an association like the D. K. E. can do in preventing a repetition of the attempt made during the recent campaign to array class against class by reason of the close bonds of brotherhood that exist among the members.

Plan for Harmon's Inauguration.

Columbus, O., Nov. 14.—According to plans formulated by the Columbus Board of Trade, the inauguration of Governor Harmon will be one of the most spectacular, non-partisan pageants that has ever been seen in Columbus. The intention is to have the entire National Guard of the city in line, as well as the independent military companies of the state, and it is expected that the famous Cleveland Greys, one of the oldest and the best drilled bodies of men in the state will be here. Then, too, an effort will be made to have the Barracks band and the permanent companies in the line of march. All the bands in the city will probably appear, as well as the uniformed and un-uniformed civic organizations.

THE MEAT OF IT.

Wesley Griffith, a Circleville (O.) recluse, was burned to death in a fire which destroyed his shack on the banks of the canal.

The plant of the Silver Manufacturing Company at Salem, O., was destroyed by fire. Loss \$100,000.

Four children were burned to death in a fire which destroyed the farm house of J. H. Wampier, near Alliance, O.

Two men were killed and three engines smashed in a wreck on the Wash railroad at Springfield, Ill.

Miss Ethel Spitzer, teacher in the Yale (Mich.) schools, committed suicide in a field near town by drinking poison.

At Jersey City, N. J., Andrew McGrath shot and killed his former employer, W. E. Ammon, butterine manufacturer, in the sight of a large crowd at the Pennsylvania depot.

Ship Has Short Life.
The average life of a ship is about 26 years.

for the education of young colored men.

A great many new negro theatres have been opened up this year in the various cities. The number of colored shows on the road would surprise one who is uninformed on the subject.

Mr. and Mrs. Charles Humes will go to housekeeping the first of the year in their beautiful new home on Burns avenue.

The ladies of Broadway under the leadership of Miss Lock, conducts a number of prayer meetings in private homes each afternoon.

Jack Tuttle is building a cottage on High street.

John Woodford and family who recently moved to Hamilton, O., have lated any thing. Besides living in an exceedingly nice residence, he is the owner of fourteen city lots and he has one daughter in College at Louisville.

Julian Baker has returned to Chicago.

The colored skating rink at Lexington was destroyed by fire this week.

The United States Supreme Court at Washington has affirmed Judge Benton's decision in the Berea College case.

Out of nearly 1000 colored children in Winchester less than 250 attend the various Sunday Schools.

People's State Bank

CAPITAL, \$100,000

This bank began business less than three years ago, just in the beginning of the financial depression. Notwithstanding the hard times there has been a steady growth from the start, in the number of our depositors, and in the volume of our business. We enroll new names every week. We want yours. You are cordially invited to open an account with us. Personal attention to all business.

HOME SILO FACTS

GREEN MOUNTAIN STAVE SILOS AT THE DAIRY M. IOWA STATE COLLEGE.

may be made an ornament of farm buildings. Its form it may be made to add to the range of the curved walls or range, gives a very pleasing effect in a setting of buildings. This improvement is independent of the use of silage as a feed and is to such a degree that the purchaser, in making a decision, would be influenced to a greater extent than the original silo.

Illustration is a view of the barn at Iowa State college showing two stave silos and the manure pits which add to the appearance of the buildings.

Silos reported by their owners, 135 were located outside of a barn and 26 inside. Those inside of a building were large and not well adapted to be inside. These reports indicate a location of the silo outside of a building meets with greater approval than those using silos. There are several reasons for this. First, the exception of a few types, a construction that it does the protection of a covered silo in a building where it is by space which may be put to use. Third, a silo located inside of a building is often unhandy to use. The forage cannot be delivered to the cutter conveniently. Fourth, by locating a silo outside of the building and only connecting it thereto with a passage provided with doors, the objectionable odor of the silage may be kept out of the building. By arranging the silo so as to be connected to the feeding room with a feed way, it should be as convenient for feeding as when located in the building itself. A very common arrangement is to locate the silo that

perfect by felt pads or gaskets. It is good practice where the silo door sets against a shoulder, to place clay worked into the consistency of putty in the joint. The clay is placed on the bearing surface and the door placed over it and when the pressure of the silage comes against the door an air tight joint is obtained. Tar paper is successfully used by some silo owners either in strips to cover the cracks around the doors or in widths sufficient to cover the entire door and lap a few inches on the silo walls.

Not only should the walls be tight and rigid, but they should be perfectly

Fig. 2. Correct and incorrect methods of constructing silo foundations.

smooth on the inside to permit the silage to settle without forming air pockets, which cause a certain amount of the adjoining silage to rot. Several foundation walls were found constructed as shown at the left of Fig. 2, and in each case a considerable amount of spoiled silage was found at the shoulder made by the wall. The foundation wall, and in fact the walls of the entire silo, should be as smooth as possible. If due care is used in tramping the silage during the filling, doors which extend into the silo are not a serious objection, though perfectly flush doors are certainly an advantage. A vertical wall is the only satisfactory wall to use, as a wall inclined outward will support the silage to a certain extent and prevent its settling satisfactorily, thus creating air pockets. When the wall is inclined inward the silage will settle away from it. In the case of concrete silos with tapered walls, these should be vertical on the inside.

Best results are obtained where the silage is uniformly distributed throughout the silo and is carefully packed near the walls and around the doors by tramping. Care should be taken that the heavy and light portions shall be uniformly mixed. Some silo owners are of the opinion that a great amount of tramping is unnecessary, but the investigations of the writers would indicate that where tramping was not followed there was always a certain amount of spoiled silage and that the money spent for labor used in thoroughly tramping the silage in the silo when filled brought good returns.

It is desirable to prevent the freezing of silage in the silo during cold weather as far as possible and the silo of a construction to prevent freezing to the largest degree is the preferable one, other things being equal. It is difficult to make a comparison between the merits of the various types of silos in this respect owing to the inability to find them under like conditions. Freezing of silage is due to loss of heat; first, through the silo wall; and second, to the air in contact with the feeding surface. The first loss may be reduced by using a non-conducting wall in the silo and the second by preventing the circulation of air above the silage in the silo.

AROUND THE HOUSE

CHAT ON MATTERS OF MORE OR LESS IMPORTANCE.

Useful Duster Devised from Worn-Out Garment—Simple Method of Marking Linen Before Sending to Laundry.

Dusters—There is nothing that can be used to dust with that can equal the lower portion of a gauze under-vest. Wet in warm water and wrung out tight, it will take up every particle of dust, and then, as it is rinsed, one feels sure of actually getting rid of so much dirt. Twenty years of dusting highly finished furniture with a soft, damp woven dust cloth has not dimmed its luster.

Old Sheets—When sheets wear out past recovery, tear out the center or worn part, sew up in a double seam, thus hiding the edges, and sew one, two or three brass rings as needed on to one end. Use this to hang over nice dresses in the closets. If too long, cut a piece off from the bottom and use to cover the sleeve board, or, if of good quality, this piece would make a pillow case.

Stockings—All stockings should be marked so as to mate. Initials can be worked in long outlining stitches with either white thread or different colored silks for different members of the family. Use the Roman numerals with one long stitch for each line to mate them. This sort of marking takes but a few moments as soon as the stockings are bought, and saves much time in sorting and gives general satisfaction in the household.

For Safety—One mother with several daughters has hit upon a good plan to protect her right of ownership. Each week when preparing clothes for the Monday wash she takes a needle with white thread and runs a stitch through one corner of each of her own handkerchiefs, also each stocking. The maid is instructed to dampen the handkerchiefs and break the thread only when ready to iron them and see that they are placed on her bureau. The same instructions are given in regard to the stockings.

Lace Curtains—All lace curtains should be soaked for a least an hour in cold water in which a little borax has been dissolved before putting them into warm suds. This takes out the smoky odor and softens the dirt. **Ice Pick**—Always remember that if the ice pick is lost or misplaced for the time being, an ordinary hat pin gradually forced into ice will produce a crack and separate the ice without a sound. Nurses in hospitals use needles and even common pins to crack ice for patients.

Shoes Blacked—There is no reason why young or old should be careless about having their footwear kept in proper condition. A lamb's wool glove and dauber can be bought for ten cents and a box of blacking for another dime. By being careful to never use but one side of the dauber there will be no need of soiling the fingers, and the wool glove gives a fine polish with very little effort.

Furniture Polish—All outlay of energy required in polishing furniture after the fall cleaning is well repaid in the appreciation shown by every member of the family. A well tested polish is made of one part benzine, one part linseed oil and two parts turpentine. Use two cloths, one to rub on the liquid and the other for polishing.

Useful Tea Stone. While all English and Irish lovers of tea have their quilted cozy to keep tea hot, the Hollanders have a tea stone that performs the same function. These are made of polished wood, are nearly circular in shape, six or seven inches in height, with a flat brass top perforated in a design. There is an opening on one side through which is slipped a glazed pottery receptacle, usually three cornered, which holds the glowing bits of charcoal that supply heat to the teapot resting on the openwork brass top.

Oyster Salad. To make this delicate dish stew the oysters in their own liquor until the edges curl. Then pour the whole into a bowl to cool. To four dozen oysters, add three tablespoonsful of vinegar, one of oil, with a little salt and pepper and set all on ice until wanted. Cut up the tender part of a head of celery into dice and mix it with the oysters, adding a cupful of mayonnaise dressing.

A Treated Duster. A big piece of cheese cloth wrung out of turpentine and dried is almost a magic duster. It accumulates all dust, does not scatter it and at the same time brightens everything it touches.

Bathtub. A ten-cent small-sized scrubbing brush is the nicest thing to use when washing out a bathtub. It appeals to the men folk of the household as a very sensible way of arranging for a rather dreaded duty.

Nut Cakes. Three pounds of sugar, half a pound of butter, one pound of finely-chopped almonds, grated rind of one lemon, three pounds of flour. Drop in pans, a teaspoonful for a cake, and bake in moderate oven.

Dishwashing Hint. Invert all hard cooking dishes over steam or hot water for a few minutes and every particle will wash off easily, especially dishes that have been used for syrup, bread or pastry dough.

Young Folks

"FIGURES" OF SPEECH.

Misinterpreted Numbers Cause Disappearance of Pie.

One day Willie Billfuzz came home from school very tired and hungry, and, going into the pantry, he saw a beautiful apple pie there looking so tempting that he could hardly resist eating it. Then he happened to notice a slip of paper bearing the figures you see here—namely, 7237 and 319. It afterward turned out that his mother had put these figures down to remind her

7237
319

of some articles she was going to look up in the encyclopedia on those pages, but Willie got the piece of paper wrong side before, and, looking through it to the light, he made them read "test pie." Not wishing to disoblige his mother in so small a matter as this, he did test the pie and found it so good that when he was through there wasn't enough of it left to be seen with a microscope.

Then he wrote under his mother's figures the numbers 21319 and 907917 and made himself scarce. When his mother came to look for the pie she only found these mysterious figures. She concluded there must be some

meaning to them, and, happening to turn the paper back side before, she saw that her figures made the words "test pie" and that Willie's read "pie is tiptop." Of course she was somewhat disappointed that Willie had disposed of her baking, but when he explained the matter she couldn't blame him, for the figures read plainly enough. You can satisfy yourself of this by turning the paper over, holding it up to the light and looking at them, or, better yet, by copying them on a blank piece of paper and looking through it from the back side. This shows how careful we should be when we make figures so that other people will not mistake their meaning.—Pathfinder.

A REMARKABLE PLANT.
South American Orchid That Seemed Endowed With Reason.
A naturalist has discovered in South America one of the most remarkable plants known to botanists. It is an orchid, and its peculiarity consists in the fact that it has a tube by means of which it takes a drink of water when it needs it—you might almost say when it wants it, for the plant really acts as if it had volition and the power to reason.

The naturalist was sitting one afternoon at the side of a lagoon on the Rio de la Plata. Near by was a forest of dead trees which had evidently been choked to death by orchids and climbing cacti. One of the orchids was growing from the branch of a dead tree that overhung the water at a distance of about one foot. From the center of the plant hung a stem about one-fourth of an inch wide. The stem reached down into the water to a depth of four inches.

There was nothing remarkable about that, but when he approached the plant and touched the stem the latter at once began to coil itself up like a roll of tape. Subsequent examination showed him that the stem was a tube, open at the lower end and connected with the roots of the plant by a series of hairlike tubes. Ordinarily the tube remained coiled in the center of the plant, but when it needed water it slowly uncoiled itself, let its lower end dip into the water and then coiled itself up again, the water from the tube pouring out into the roots. He saw this remarkable action repeated time and again, just as if the plant felt thirsty and would reach for a drink of water as a man would do in the same circumstances. He found many of these orchids, some of them over places where water had been, but was no longer. These would uncoil their tubes and reach about over the ground in search of it, which made him feel more than ever as if the thing had human sense.—Chicago News.

Perils of Bad Company. There was once a farmer whose corn was destroyed by the cranes that fed in his field. He grew angry and declared he would stop the nuisance. So he put up a net and caught not only the cranes, but a fine large stork that had come down from a neighboring roof to chat with the crane.

"I'll wring your necks," said the farmer. "You are pests and have hurt my fields."

"Spare me!" cried the stork. "I'm innocent; indeed I am! I never touched any of your belongings."

"That may be true," answered the farmer, "but I find you among thieves, and I judge you accordingly."

The Zoo. If polar bears were on the stairs, If tigers came to tea, If fearsome bats and silver sprats Came in to call on me And giant snakes ate all the cakes, How happy I should be! If leopard rays arrived to stay And brought the kangaroo, If parrots red within my bed Should put the cockatoo, I'd laugh with glee, because, you see, I just adore the zoo.

THE COLLEGE COURSE.

Learning, Like Vaccination, Does Not "Take" on Every One.

In an article on "Shall the Girl Go to College?" Annette Austin writes in Smith's:

"Too much value cannot be accorded to a college course for girls who are capable of taking it. Unfortunately, however, college, like vaccination, does not 'take' on everybody.

"Here it might be well to consider the advisability of sending a girl who desires to fit herself primarily for a housewife to a school of domestic science. 'Why,' asks a mother, 'if my girl does not intend to work for her living and if she really needs practical experience in homekeeping, should she not go directly to a school of domestic science, where she gets speedily and in concrete form the latest methods of cooking, house furnishing and caring for children?'"

"If you are truly convinced that the best way to prepare for a vocation is to learn the details of its practice in a detached form, entirely away from all other related facts in life, by all means send your girl to a domestic science school as soon as possible. But a course in domestic science without the preliminary mental discipline of at least two years in college is a very poor investment for the future.

"To go through the forms of mixing so many ounces of flour and so many cups of butter to make a pound of cake, to bind up the broken finger of a wooden manikin and to practice laying a table for a model luncheon for six is not learning to be a housewife. It is merely putting in a stuffing of surface details on a foundation of sand.

"Still, if your girl is delicate and unable physically and mentally to survive the more strenuous discipline of college it would be better to send her to a school where her mind will not be too severely taxed. It would be more humane to have her dabble delightedly in fancy desserts than to let her suffer in the maze of physics and philosophy."

BILLIKEN STATUES.

The Smiling God of Things as They Ought to Be.

It is useless to try to explain the popularity of Billiken. You can buy him for from 25 cents to \$10. He is now on the bookcase, over the desk, on the bureau and in the traveling bag.

He rivals the popularity of the jigsaw puzzle. When you are not patching puzzles you are buying or borrowing a new Billiken. The statues are now loaned for a hundred years at a penny a year. This is the new fad. This includes Billiken's throne and also the luck he brings.

The first pennies must be righteously paid or your luck is gone. You must give Billiken to anybody. You must loan him at interest. So all the girls are doing this as the fad of the year.

If a Billiken is sold it is by a hard hearted, money grubbing shop. After this Billiken is owned or loaned, Billiken, you know, is the god of things as they should be. He will help you to see things right and give you the power to do them.

One of his best mottoes is, "Grim and begin to win."

If anybody can keep from grinning when gazing upon the grin of Billiken one must have a sour soul indeed!

No Dispute Whatever.

A man and his wife were airing their troubles on a sidewalk one Saturday evening, when a good Samaritan intervened, according to Everybody's Magazine.

"See here, my man," he protested, "this sort of thing won't do."

"What business is it of yours, I'd like to know?" snarled the man, turning from his wife.

"It's only my business in so far as I can be of help in settling this dispute," answered the Samaritan mildly.

"This ain't no dispute," growled the man.

"No dispute? But my dear friend—"

"I tell you it ain't no dispute," insisted the man. "She"—jerking his thumb toward the woman—"thinks she ain't goin' to get my week's wages, and I know darn well she ain't. Where's the dispute in that?"

KITCHEN HINTS.

Mix prunes and raisins for a supper dish. The raisins give the prunes a tang that is savory.

Save fuel by washing beans and all dried fruits until the water poured off is clear. Then soak overnight, covering them with warm, not cold, water.

To get best results with rice wash quickly in cold water and drop slowly into water that is boiling rapidly. Rice prepared in this fashion will be soft and meaty, yet whole, in twenty minutes or half an hour. Have plenty of water in the kettle and drain the rice directly it is cooked—before the water stops boiling.

To get best results with macaroni do not break it before cooking. Drop it whole into salted boiling water, cook twenty minutes, drain in a colander, roll it in the baking dish, pour cream sauce over it and finish off with grated cheese and bits of butter. Bake golden brown. You lose much of the substance in breaking it in short lengths before cooking.

To make the mint jelly so popular—and expensive—at exchange and tea rooms try this recipe: Wash and bruise a bunch of fresh mint, cover with a pint of boiling water and simmer very gently fifteen minutes. Strain and to every pint of this liquid while hot allow a package of ready to use lemon jelly powder. Add sugar to taste. Stir until sugar and jelly powder are dissolved. Mold and set on ice to harden. Garnish with fresh mint leaves.

FOR THE BREAKFAST TABLE.

Suggestions for Those Who Would Begin the Day Well.

The average American family is fast following in the footsteps of foreign cousins and eating light breakfasts and one hot dish is considered sufficient. The motherly mother and devoted wife may find one or two of the following dishes tempting. Generally speaking, something with a little salty flavor appeals to a man's appetite.

Finnan Haddie and Eggs—Select a thick fish and cut into pieces large enough for single portions. Parboil the fish on the fine broiler, rub butter over it and broil until nicely browned. Lay on a hot platter, brush once more with butter, squeeze a little lemon juice over it and serve with a poached egg on each square of fish.

Baked Breakfast Dish—In the bottom of a baking dish put a layer of cold mashed potatoes left from dinner. Sprinkle with bits of butter. Over this place a layer of finely chopped ham and then break several eggs over the top. Place in a moderately quick oven and bake until done. Grated cheese may be added on top of the eggs if cheese is liked. Many prefer it without the cheese for breakfast and with the cheese for luncheon.

Bacon in Potatoes—Select large potatoes of even size and cut a small piece off one end so they will stand. When baked remove the second end scoop out part of the inside. Fill this cavity with chopped broiled bacon, making a little pyramid in each potato. Serve on hot platter and stick a sprig of parsley in each potato.

Barberry Jelly.

Add enough water to nearly cover the berries. They should be thoroughly cooked and drained through a jelly bag. Add one pound of sugar to a pint of juice. Boil gently, removing any scum that may arise until the juice thickens when dropped on a plate. Then pour in tumbler and seal. I should boil the juice 15 or 20 minutes before adding sugar.

Here is another recipe: Take as many apples by measure as barberries, remove bad places, then quarter. Do not pare or core. Add berries with water enough to cover, boil until the apples are soft, then strain. To a cup of juice use a cup of sugar, put juice on to boil about 20 minutes. In the meantime put sugar in the oven to heat. Stir often so as to not burn. Put all together and boil until it comes to a jelly. Sometimes it takes only five minutes. Make it on a clear day.

Rose Cake.

Here is a cake to serve with the ice at luncheon. Bake in a brick loaf, cover with a white boiled icing and serve uncut on a handsome platter with a single pink rose laid on each side. Let the hostess cut the cake and serve it on small plates. The recipe reads: Cream one cup of butter with two cups of sugar, mix one cup of corn starch with one cup of milk and stir into the butter and sugar; beat until smooth, add one-third teaspoon of rose flavoring then stir in two cups of flour sifted with four level teaspoons of baking powder. Beat just enough to mix well, fold the stiffly beaten whites of four eggs in lightly, and turn into the buttered and floured pan. Bake in a moderate oven.

A Macaroni Dish.

Have ready a cupful of macaroni which has been boiled in salted water and cut up rather finely. This means a cupful after cooking, not before, and the pieces should be half an inch or more in length. Melt a tablespoon of butter in a skillet, and add one tablespoon of cornstarch and stir until well mixed. Add gradually half cup of sweet thin cream and cook two minutes. Add quarter teaspoon of salt, a dash of cayenne pepper, and quarter teaspoon of mustard. Into this sauce stir first your macaroni, then half pound of mild American cheese, grated. Stir and simmer gently until the cheese has melted, then turn the mixture out on triangles of toasted bread. Serve at once.

Apricot Catsup.

Cook two gallons of very ripe apricots for one hour; then remove from fire and put through colander to remove the pits and skins; then add one gallon of pure cider vinegar, two pounds of brown sugar, three tablespoonfuls each of cinnamon, cloves, mace, allspice and ginger and one cupful of horseradish. Return to the fire and cook three hours. Bottle when cool.

"Expert" Carving.

At a dinner where half a duck was served each guest the host was complimented upon his skillful carving. Later it was divulged that before cooking them the birds were cut in two, stuffed, sewed together and baked. Mr. Host merely cut the threads at the table.

Regarding Cake Pans.

Do not grease your cake pans with butter. This is the poorest of all material for this purpose. If it is better than anything else. To positively avoid having the cake stick to the pan, first grease the pan and then line it with greased paper.

Good Paste.

To a pint of smooth thick paste add one teaspoonful of powdered alum and ten drops of clove oil, this will keep it moist and also prevent it from turning sour.

To Keep Flues Clear of Soot.

Stove pipes, boiler tubes and flues may be kept free of soot by occasionally throwing a scrap of zinc into the fire.

An Automatic Cheese Press

This form of cheese press maintains overhead. The 140-pound weight is a constant pressure for any desired sufficient to keep the screw pressed length of time by means of a rope up to the cheese. A close cheese is wrapped around a pulley at the end obtained free from any mechanical and over a small pulley on a beam opening.

GIFTS

How to Make Christmas Presents For Both Sexes—Hatpin Cushion—Needlebook—Suit Case Set For a Man.

The hatpin cushion shown is made of pompadour ribbons and val lace. It is tied in the center with baby ribbon.

The needlebook is also a dainty little trinket, easily made, and appreciated either by men or women.

The design shown is a conventional primrose pattern worked in ribbons.

For the man who travels nothing will be more appreciated than what is called

MATERIALS REQUIRED.

One piece of cotton wadding.
One yard of Dresden ribbon.
Yard and half valenciennes lace.
Quarter yard taffeta silk.
Two yards baby ribbon.

HATPIN CUSHION.

ed a suit case set. So many people use the suit case, but have never been able to overcome the difficulty of keeping the shoes and brushes from rubbing up against their clean linen. There are three different articles in this set, all of which are made of coarse linen. The receptacle for shirts is in the shape of a large envelope, the edges bound with braid, and should be large enough to contain two shirts.

The bag for collars is made from the same material. The bottom is circular and made from pasteboard. A good idea is to sew to this a strip of pasteboard about two inches deep. These should be covered with the linen before being fastened together. The upper part of bag should be full and gathered with a drawing string. This protects the collars from crushing as well as keeps them clean.

The third article in the set is a plain linen bag lined with oiled silk. This is intended for sponges and protects the contents of the suit case from the moisture of this toilet necessity after it has been used. The hairbrush can be put in this bag if no sponge is used. The monogram can be embroidered on the outside.

To make a slumber robe for baby take two and a half yards of plain silkoline, three bolts of No. 1 ribbon, one skein of Shetland floss and one bat of fine cotton.

Divide the silkoline into two equal parts, place in a frame and put in

MATERIALS REQUIRED.

Quarter yard of plain taffeta silk.
Quarter yard of brocade silk.
Filo embroidery silks.
Two yards of half inch ribbon.

NEEDLEBOOK.

layers of cotton between, ready for tying.

Tie the ribbons all in tiny bows. Thread the needle with the Shetland floss, using it double. Bring the needle up from the bottom, then down again, taking a stitch through one of the bows. Tie the yarn on the wrong side, with three or four extra needles tied in the knot to make a small tuft.

Continue the knotting in this manner, beginning with two and a half inches from the edges, making the tufts four inches apart. Turn in the edges all around and buttonhole closely with the yarn used singly.

Crochet a row of shells around the quilt, each shell of five double crochet fastened with a single crochet and placed close enough together to make the work lie flat and full at the corners.

On the right side, just inside the buttonholing, make a row of feather stitching with the yarn.

This makes a light, dainty cover for the baby. It is very pretty of blue silkoline tied with white ribbons or of white silkoline tied with pink and blue.

Safety Pin Holder.

As a gift to young mothers to accompany the baby basket safety pin holders make useful presents.

A MISSION PILLOW.

Christmas Gift Design—Which Carries Out a Stained Glass Pattern.

So popular has become the mission style of furniture that now there is a real demand at Christmas time for sofa pillows in the same type of design.

Herewith is given a very effective design in this style that is sure to meet

MATERIALS REQUIRED.

Three-quarter yard of brown art ticking.
Two skeins of yellow embroidery silk.
Two skeins of red embroidery silk.
Two skeins of blue embroidery silk.
Two skeins of green embroidery silk.
Two yards of cord.

A MISSION PILLOW.

the hearty approval of embroiderers who desire an odd mission cushion.

It is known as the stained glass design and is worked out in the reds, blues, yellows and greens.

Two yellow petals, two blue petals and one red petal are used in the embroidering of the flower.

The buds are worked in red, with cross section in the center worked in green at the top and bottom of the pillow, and in red with the cross sections in blue at the sides. The stems and dots are worked in red.

The design is padded and then worked in the satin stitch. If desired, it may be worked in outline stitch only, but will not be nearly so effective.

If it is not desired to have colors, then the pillow may be prettily worked out in tan shades on natural colored linen, or the deift blues may be used.

A prettier design for a Christmas pillow can hardly be imagined.

AN APRON WORKBAG.

Christmas Present Idea Borrowed From the Land of the Caesars.

The idea used in making this apron workbag was taken from the land of the caesars, where all the women in every station of life are expert workers in embroidery. The apron illustrated is made of one yard of silk, but

MATERIALS REQUIRED.

Two yards of india linen or
Three yards of silk or pongee.
Five yards of inch wide ribbon.
Embroidery silks.

THE BAG CLOSED.

pretty cretonne is an excellent material to use. Divide the yard into three parts, two of which form the bag and the other third the apron, and mark carefully. Hem one end, then fold over at the two-thirds mark and run a tuck along this line the same depth as the hem. Be careful not to do it on the same side as the end hem, as this forms the other side of the bag, through which the ribbon is run to draw up the bag when not in use.

Hem the apron portion the same side as the tuck. Embroider the front of the bag as illustrated or work the initials of the prospective owner. Join up

THE BAG OPENED.

the sides, run a ribbon through from each end which draws the bag up, then run a ribbon through the waist part.

Becky Sharp Needlebooks.

Quaint and pretty are the Becky Sharp needlebooks, completed at so little trouble, too, that they are well worth describing. Two pieces of cardboard five inches in diameter are covered first with perfumed cotton and then with silk or satin, not necessarily alike if the contrast is good, though the effect is better if the two forming the lining match. Overhand all around the circles and cover the stitches with a fine silk cord, then connect the two by means of a bow of narrow ribbon and sew in flannel leaves pinked on their edges for holding the needles. The ties are of ribbon, and at this stage very fine lace edged doilies the size of the needlebook are sewed invisibly to the outer parts of the covers. This is a dainty addition to the workbox as well as a useful one.

Gift For Bostonians.

If she is a Boston girl or he is a Boston man, give her one of the new individual pottery bean pots with covers. They are table novelties that are pretty enough to decorate the shelf of the library or dining room.

ROAD AND FARM IMPROVEMENT

CONCRETE CULVERTS.

Easily and Cheaply Built—Some Details of the Work.

The greatest trouble heretofore in making concrete culverts, drains, etc., has been to remove the core, which is very easily remedied by building the core, as illustrated, in four sections, two sections being joined together, so that when removing from the completed culvert it folds together and is removed in a moment's time. Again, by having the core circular in form you gain greatly in the strength of the completed work, as the arch will withstand a greater pressure than the usual square form used for this purpose.

This simple machine can be built by anyone, declares A. A. Houghton, in Orange Judd Farmer, and is made as follows: At both ends of a board ten inches long, 2 1/4 inches wide and one

Fig. 1.—Construction of Core.

inch thick, make a mark three-quarters of an inch from the bottom. Place this beside a wide board of same thickness on your workbench, and after setting your compass at seven inches, draw a quarter circle from one of the 3-quarter-inch marks to the other; this will describe just one-fourth of a circle 14 inches in diameter. The board is cut along the circular mark just drawn.

Now on the bottom edge make a mark at each end of this board just three-quarters of an inch from the end along the bottom edge; draw a line from this mark to the end of the circular cut just made and saw off this little three-cornered piece, which miter the board at an angle of 32 degrees, and so allows the four segments of circle to fit together to form the completed circle. Use the board you have just cut as a pattern and cut 15 more exactly like it.

Now take one-inch strips which are seven, eight or ten feet long, whatever length you desire to culvert, and nail to these circular pieces, as shown in Fig. 1. Place one of each of the quarter segments of circle at each end and two at equal distance apart in center, and when you have nailed the strips as illustrated one-fourth of it is finished. Two of these sections are joined together with strap hinges, as shown in Fig. 1, a hinge being placed in each of the four corners where the sections are joined together, and which allows them to fold down together.

Now for the folding brace to hold the sections upright while making culvert, use eight pieces of board one inch square and five inches long; at one end of each one cut a long, slanting miter, as illustrated in Fig. 1, to allow them to fold nearly together. Join two of each together

Fig. 2.—Removing the Core.

with hinges in center as completed brace, and at each end, as illustrated in Fig. 1; the two hinges at ends of completed braces are fastened to sections, as illustrated, and hold them upright or allow them to fold down as required.

The core is now complete and will mold an opening in culvert 15 inches in diameter. When a larger or smaller opening is desired you can simply change measurements in cutting the material to make the size desired.

In operation, boards are set at each end of the culvert, also at sides; the bottom is filled with concrete mixture to the depth of two inches; then the semi-circular forms are set in place, with edges together, and the concrete mixture filled in around them and on top to the depth of three, four or six inches, according to the pressure that is to be placed on the culvert. For ordinary usage a four-inch depth on top is sufficient.

When finished the concrete is allowed to set or harden for several days, when the side boards are removed and the braces on center forms or core pushed back, folding the forms together, so that they can be easily removed, as illustrated in Fig. 2. With this simple machine a neater, stronger and more satisfactory culvert can be molded, with less labor and more certain results than with any square form.

Poultry Products.

Secretary of Agriculture Wilson places the value of poultry products produced in the United States last year at \$600,000,000, which is \$100,000,000 more than the value of the wheat crop.

Use of Leather Belting.

In putting up leather belting experienced machinists make it a point to place the hair inside, as it has a tendency to stick to the wheel and will wear longer.

JOB PRINTING

Our Plant is equipped with the latest facilities to turn out the best of Job Work.

Our Business has increased materially in the past month. It is growing steadily from day to day. People who never patronized this office before are bringing their work here.

Nothing Is Too Large for us to handle. Nothing is too small to prevent our giving it the very best of attention.

We Have the Best Plant in Eastern Kentucky. All work is carefully taken care of and jobs are turned out of this office the day they are promised. There is no irritating delay.

We Are Also Prepared to handle Book Work, Pamphlets, Circulars, Folders and all kinds of bound and folded work.

Lawyers' Briefs can be set as expeditiously and cheaply as in any part of Kentucky.

All We Ask from any one is a single trial. If we do not satisfy you, we will not urge you to come again.

SOCIETY

Post-Graduates Meet.

The Clark County Post-Graduate Society met with Drs. Combs, Thursday night. Dr. Venable delivered an interesting lecture. Those present were: Drs. W. C. Worthington, J. N. Rankin, E. R. Bush, E. R. Cole, D. H. McKinley, J. W. Ishmael and I. H. Browne.

The next meeting will be on November 19, with Dr. McKinley. Drs. Clark and Lyon are on the program.

Enchre Party.

Miss Stella Curry entertained the "Jubilant Enchre Club" at her home on South Main street, Thursday evening. The house was artistically decorated in ferns and palms. The color scheme of green and white was tastefully carried out. After the games were finished, prizes were awarded, and an elegant lunch was served.

"Chocolate Drinking."

Miss Ella Pendleton entertained Saturday morning with a "chocolate drinking" at her home on College street, in honor of her guests, Misses Ruth Scott and Mattie Weathers, in her delightful way.

The house was decorated in palms, ferns and all kinds of potted plants.

In the hall, Miss Pendleton, looking beautiful in red silk; Miss Scott, in a superb gown of grey voile, with Persian trimmings, and Miss Mattie Weathers, in pink messaline, with lace garniture, received their guests in a most charming manner. From there, they were shown upstairs, where Misses Besse Byrd and Nancy Katherine Quisenberry, robed in white chiffon, served chocolate in the upper hall, to the delight of the guests. After passing the many customary courtesies, the guests passed into the dining room, where Miss Allan Crutcher, in blue silk, served a splendid meat course. Only those who have had the pleasure of being present can fully appreciate the enjoyable hours the hostess is capable of making her guests spend.

Among those present were: Misses Ruth Scott, Mattie Weathers, Besse Byrd, Nancy Katherine Quisenberry, Allan Crutcher, Sara Beverly Jonett, Sara Goodloe Benton, Margaret McKinley, Margaret Spbar, Florrie Smith, Richie Lane, Dee and Rena Scobee, Illa and Lucy Stewart, Cora Baldwin, Amelia Van Meter, Emma Lee Taylor, Winnie Garrett, Norma McCullom, Anna Mae Hise, Margaret Bryan, Mabel Shipp, Catherine Robb, Edna Gaitskill, Nell Allen, Anna Bean Allen, Jeannette Tracy, Ann Duerson, Sue Scrivener, Marietta Powell and Mrs. John T. H. O'Rear.

Thanksgiving Dinner.

The Brown-Proctoria has made arrangements to serve a most elaborate dinner on Thanksgiving day. All viands which have made Thanksgiving's midday meal famous as far back as the memory of our oldest citizens extends, will be served in a magnificent manner.

PERSONALS.

Messrs. C. B. Ross and Algin Wells, of Lexington, spent Friday in this city.

Mrs. Creth Taylor is visiting in Louisville.

Miss Emma Coons, of Lexington, visited here, Thursday.

Little Martha Short, of Cleveland, Okla., is recovering from a severe attack of diphtheria and scarlet fever. She is a grand-child of Mr. and Mrs. Lewis Wells, of this city.

Mr. Jesse Rogers, of London, is the guest of friends, here.

Mr. J. R. Lang, of Lexington, is in the city, on business.

Miss Annie Freeman is visiting in Lexington.

Mrs. W. O. B. Donaldson and Mrs. Curtis Evans have returned from a visit in Louisville.

Mr. Robert George, of Carlisle, is visiting his brother, Mr. C. B. George.

Mrs. H. A. Rogers, of Mt. Sterling, was shopping in Winchester, Friday.

Miss Margaret Bush is visiting Mrs. Mary Rogers, in Lexington.

Mrs. C. R. West and daughter, Miss Norma, are visiting in Portsmouth, Ohio.

Mrs. Martha Crist is the guest of of Mrs. C. B. George, en route from Chicago to her home in Catlettsburg.

William S. Massie, Jr., is visiting his aunt, Mrs. John D. Hedges, in Paris.

Mr. Jim Hadley, of Cincinnati, is visiting in the city.

Dr. D. H. Cook was in Frankfort Friday, on business.

Mrs. O. S. Johnson, of this city, is visiting Mrs. O. S. Johnson, of Millersburg.

Mr. J. A. Van Houten is recovering from a week's illness.

Mr. C. S. Guy is ill at his home, on Maple street.

Mr. and Mrs. S. B. Tracy are in Cincinnati, where Mrs. Tracy is consulting an oculist.

Mr. J. W. Hise and family have moved from Highland street to West Broadway.

Mrs. Avelly Winston and Mrs. Anna Bridges, of Lexington, motored to Winchester Thursday, and were guests of Mrs. Col. Tucker, on Fairfax street.

Two children of Ellis Noel, on the Ruckerville pike, are ill of typhoid fever.

Herbert Lee Rice, son of Mr. Ed Rice, is dangerously ill of pneumonia.

Mr. N. K. Foster, who has been traveling in West Virginia and Ohio, for the American Tobacco Company, has returned to this city.

Dr. George Varden, of Paris, was in the city, Saturday.

Mr. R. S. Scobee, who has been confined to his room the past few days on account of an attack of la grippe, was able to be out again, Saturday morning.

Mrs. D. M. Shearer, of Winn avenue, is visiting relatives near Jetts Station.

Mrs. R. A. Shaw, of Williamstown, Ky., is the guest of Mrs. Tom Rash on Jefferson street.

Mr. C. S. Haggard who has been ill at his home on Winn avenue, is able to be out again.

Mrs. L. A. Trumbo who has been visiting her sister, Mrs. D. M. Shearer on Winn avenue has returned to her home at Frankfort, Ky.

Mr. William Garner, Jr., who has been very ill with tonsillitis is very much better.

Miss Myrtle Owen, of near Tulip, will go to Indianapolis, Ind., Sunday to spend the winter with her sister, Mrs. Martin Reed.

Mr. Joe T. Luman went to Richmond, Ky., Saturday to conduct a big chair sale at that place.

Mr. Dillon Owen and family, of Mt. Sterling, were visiting their parents on Kentucky street Friday.

Mr. Joe T. Quisenberry went to Richmond Saturday to attend the Federal Court in session at that place.

Mr. J. Christopher, of Irvine, Ky., is visiting Mr. and Mrs. W. R. A. Stevens on Jackson street.

The infant daughter of Asa B. Jones is seriously ill with diphtheria.

Mrs. Sam A. Jeffries returned this afternoon from a visit of two weeks to her parents and other relatives at Dayton, Ky.

Mr. W. M. Todd, of Ruckerville, was called to Millersburg, Friday, on account of the illness of his daughter, Mrs. H. L. Higgs.

Mrs. Gahagan and Miss Weathers, of Chilesburg, are the guests of Mrs. A. J. Earp.

Mrs. I. A. Shirley is quite ill and they fear typhoid fever.

Mrs. Brown, of Cincinnati, is with Miss Nette Batson on Lexington avenue.

Mrs. Dwight Pendleton was in Lexington Friday.

Miss Bessie Haggard was in Jackson Saturday.

Mr. and Mrs. J. Crews Rash returned to their home in Clay City Saturday morning.

Messrs. Tom and Harvey Brook, Joe O'Brien, Earl Woodford, George Kohlbas, Andy Adams were in Lexington Friday.

Miss Jane Gaitskill and Mr. Robert Taylor went to Owingsville Saturday to be the guests of Mr. and Mrs. J. B. Hampton for several days.

Judge and Mrs. J. M. Benton were in Lexington Friday.

Miss Laura Spurr was an attractive guest in town Friday.

Mrs. George Ballard was in Lexington Friday.

Miss Sara Beverly Jonett returned home from Lexington Friday, after a most charming visit to friends.

Dr. Tom Price, of Harrodsburg, and Mr. Will Price, of Covington, arrived Saturday to be the guests of Mrs. M. E. Price for a few days.

Mr. Renick Robb was one of an opera party in "A Dream Waltz," Friday night.

Mrs. David Thomson and Miss Emma Thomson were in Mt. Sterling Thursday.

Don't forget the Auditorium tonight, for there will be "large doings."

Miss Emma Turnbull is visiting in Lexington.

Mrs. Morrow and daughter, were in Lexington Friday.

Mrs. W. B. Conway, of West Liberty, is visiting relatives at Mt. Sterling.

Mr. W. O. Thacker and wife, of Mt. Sterling are visiting relatives at Ford this week.

Wm. Miller & Co., America's leading furrier, will assist in the Fur Opening, Monday, November 16th at The Curry Dry Goods Co. 11-13-21.

TEACH JOURNALISM AND ADVERTISING.

New Courses to Be Added to Curriculum at State University.

LEXINGTON, Ky., Nov. 14.—Prof. A. St. Clair Mackenzie, dean of the department of English at the State University, announced to the students of his classes yesterday that a class in journalism and the art of advertising will be introduced in the university in the immediate future if a sufficient number of students express a desire to take up the work. Prof. Ralph Morris, assistant instructor of English, will have charge of the work. Mr. Morris is a graduate of Harvard University and has had considerable experience along that line of work. He has also spent three years teaching in Japan. It is expected that several students will matriculate when the course is opened.

DEATHS AND FUNERALS.

Lizzie Franklin Hadley.

Lizzie Franklin, the five-year-old daughter of Mr. and Mrs. John L. Hadley, died at the home of her parents in Jackson Thursday afternoon, after an illness of several weeks of whooping cough and pneumonia.

The remains were brought to this city Friday night and the burial took place in the cemetery here Saturday morning at 11 o'clock. The services were conducted at the grave by Eld. J. W. Harding.

Mr. Hadley is well known in this city having been connected with the East Tenn. Telephone Company for a number of years and has a number of friends here who extend him their sympathy in his sad bereavement. This is the second child that Mr. and Mrs. Hadley have lost within the last year from whooping cough.

Mr. William Batson.

The funeral of Mr. William Batson, who died Friday afternoon will be held at his late residence on Lexington avenue Sunday afternoon at 2 o'clock. Services conducted by Rev. O. J. Chandler. Burial in the Winchester cemetery. The following will act as pall bearers: C. I. Stewart, W. M. Massie, Oll' Flynn, C. H. Rees, John Hodgkin and Charlie Jackson.

Mr. Campbell Shaw.

The St. Louis Republic of Monday last contained the following notice:

Campbell Shaw, for many years a resident of Kirkwood, and a son of the late Captain John Shaw, died at his home, Main and Filmore streets, at 2 o'clock yesterday morning. He leaves a widow and one son. The funeral will be held at 11 o'clock this morning. The body will be sent to St. Charles, Mo., for burial.

Mr. Shaw was well known here Mr. and Mrs. Shaw and their son and Mrs. Tompkins spent the summer of 1907 in Winchester. Mrs. Shaw is the grand-daughter of Gov. Clark and was Miss Tompkins before she married. She has many relatives in this county.

Beautiful Talk.

The subject of the sermon delivered by Rev. Wm. Cumming at the First Presbyterian church Friday night was: "There's only one way to be saved, and that's God's way." It was not a sermon, in the sense in which that word is generally accepted. The discourse was a heart to heart talk, full of tenderness, and eloquent in its earnestness and simplicity; a talk such as one brother would give to another or a loving father to his children. It is such sermons as this one which will win their way into the hearts of the wayward, which would have remained story to the pleadings of the rarest eloquence.

"First in War, Etc."

The phrase, "First in war, first in peace, and first in the hearts of his countrymen," was first applied to George Washington by Henry Lee of Virginia in a eulogy delivered in the house of representatives, December 26, 1799. He had previously introduced a resolution that a committee be appointed to consider the most suitable manner of paying honor to the first president of the United States.

ROCKFELLER TO TAKE STAND

Will Be Witness Next Week in Government Suit Against Standard Oil.

Special to The News.

NEW YORK, Nov. 14.—John D. Rockefeller will go on the stand next week when the hearing in the Government suit to dissolve the Standard Oil Company is resumed. He will be a willing witness.

MEDICOS DISCUSS "TYPHOID FEVER"

Dr. W. A. Bush Reads Interesting Paper Before Clark County Society.

The Clark County Medical Society met in regular monthly session in the county court room at the court house at ten o'clock Saturday. Those present were Drs. M. S. Browne, I. A. Shirley, O. R. Venable, Glenmore Combs, C. G. Stephenson, W. A. Bush, J. N. Rankin, W. C. Worthington, D. H. McKinley and E. R. Cole. After transacting regular business, Dr. W. A. Bush read an excellent paper on "Typhoid Fever," which was liberally discussed by all present. The discussions were taken by stenographers and together with the paper will be transmitted to the State Medical Journal for publication.

DOWAGER EMPRESS IS MORTALLY ILL

Government Foreign Board Confirms Report of Mortal Illness.

Special to The News.

LONDON, Nov. 14.—A Peking dispatch to Reuters states that the Empress of China died on the night of November 10.

Peking, Nov. 14. 5 p. m.—It is now reported that the Dowager Empress is mortally ill. This is confirmed by the Government Foreign Board. The Empress is reported so low that death is regarded as imminent.

PEKING, Nov. 14.—The Empress died shortly after five p. m. this evening.

OPERA HOUSE.

Dave Heilman, business manager of the Howard Dorset Company was in the city Saturday arranging for the appearance of his company at the Opera House on next Saturday matinee and night when they will present two of their best plays, "Maud Muller," at the matinee and "For His Brother's Sake" at night.

Mr. Heilman formally managed the local play house and has many friends here. He says he has the best popular price show on the road and Heilman never told a lie about how good a show was. But anyhow every knows Howard Dorset always good.

TREASURERS SELECTED.

MT. STERLING, Ky., Nov. 14.—At a meeting of the Montgomery County Board of Control, Mr. Emmet Y. Nelson was designated to countersign all checks for tobacco coming to Montgomery county growers, and The Traders' National Exchange and Mt. Sterling National Banks, of this city, appointed treasurers. It is believed that money for crops sold will be distributed in this county in the next few days.

Mules Bring Good Prices.

Mr. T. S. Robertson, of Bethel, has sold to North Carolina parties thirty-two coming two-year-old mules for \$140 per head. The mules were extra good ones.

Prominent Banker Recovering.

Mr. Pierce Winn, cashier of the Montgomery National Bank, is recovering from a serious illness, and will shortly be able to attend to business.

SOME TURKEYS.

E. Renaker, agent for the C. B. Gilman Cold Storage Company, of Lexington, Ky., has bought and shipped from here this week the following lots of turkeys:

Powell & Quisenberry 1,400
W. R. Owens 1,500
Fox & Brookshire 1,800
Gilbert Bros. 500
Fred Craycroft 500
Jess Tives 500
Total 6,000
The price paid was 12½ cents.

INQUIRE OFTEN,

But judge rarely, and thou wilt not often be mistaken.

But you will use good judgment if you will visit our store often.

You can always find the right thing there.

C. H. BOWEN, Jeweler and Optician.

URGES LOCAL PARCEL POSTS

WASHINGTON, Nov. 14.—Postmaster General Meyer announced today that the postal deficit for the fiscal year ended June 30, 1908, amounted to \$16,910,270. The receipts were \$191,478,633 (being \$7,893,657 great than the previous year) and the expenditures \$208,351,886. The deficit is the largest in the history of the postoffice department.

An analysis of the figures shows that \$9,891,321 represents the advance in the rate of compensation authorized by Congress for employees of the railway mail service, rural delivery service, city delivery service, and assistant postmasters and clerks in postoffices. The normal increase in the revenue for several years was about 9 per cent and in 1907 4.29 per cent, the falling off in the rate of growth being due to the financial depression.

The postmaster general said that in his annual report he would call the attention of Congress to the fact that he is "firmly convinced that the establishment of a special local post confined to rural routes would tend to wipe out the postal deficit and would finally make the rural delivery self-sustaining, besides being of convenience to the farmer and a boon to the retail country merchants." There are now in operation more than 39,000 rural routes, he said, serving a population of about 18,000,000 people, and should an average of fifty-five pounds of merchandise be carried by the rural carrier on each trip throughout the year, it is estimated that \$15,000,000 would be realized.

The rate would be five cents for the first pound and two cents for each additional pound up to eleven pounds, the maximum weight of a package. With the exception of a small percentage paid to postmasters of the fourth class for increased cancellations, he said, all revenue from this parcel post would be clear gain, as there would be no railroad transportation whatever, the service being confined to packages mailed by bonafide merchants and patrons of the rural routes.

"I feel," continued Mr. Meyer, "that from an administrative and business viewpoint it is most desirable that such legislation be enacted."

"Always the Same, Sometimes Better."

ADVERTISE IN THE NEWS.

MIRACLES OF MODERN SURGERY POINTED OUT

Knee Joint of Dead Man is Used to Replace One on Living Person.

PHILADELPHIA, Pa., Nov. 14.—The wonders of experimental surgery accomplished at the Rockefeller Institute of Medical Research, New York city, were outlined before the opening session of the American Philosophical Society in much greater detail than they have ever given to the public.

Among the latest achievements of science described by Dr. Alexis Carrel, who has accomplished many of the most difficult experiments at the Rockefeller Institute, was the transplanting of one dog's leg to another dog's body.

The fox terrier patient readily assumed normal control of the new leg, which was taken from a dead dog, and within three weeks the wound showed only a scar and the dog was up and around on all fours—three that were originally his own and one of the late lamented other dog.

The transplanting of cats' kidneys into other cats, even after the organs have been in cold storage 60 days, has proved entirely successful. Human arteries and jugular veins have been interchanged, and the patients have been unable to tell the difference.

Applications of the experiments performed on the dogs and cats to the rejuvenation of ailing humanity is, in the announced opinion of Dr. Carrel, entirely possible. Already the knee joint of a dead man has been used to replace the injured joint of a living person. A woman too weak to undergo a major operation has had her arteries joined to those of her husband, and, with the added strength of her husband's circulation and heart action, has successfully undergone the shock of the surgeon's knife and survived an operation under which she would have otherwise died.

CONFEDERATE CANNON.

Stolen From Camp During the Civil War to Be Used in Celebrating the Taft Victory.

The most unique cannon that will be fired by the Republicans of Kentucky in celebrating Taft's election is that in the family of Reuben Patrick of Magoffin county, which was taken from the Confederates during the Civil War and is the first breech-loading cannon ever used in an American army.

The cannon belonged to a squad of artillerymen commanded by Captain J. J. Schofield, of Iuka, Ill., and was invented by a man named Williams of Covington, Ky. Robert Williams, a son of the inventor, now lives in Covington.

This cannon was one of the battery of six that was cast at William's request, and while being taken from Kentucky to Virginia by Colonel Tom Johnson, was stolen from the camp near Salyersville. It has been in the family of the Patricks since that time and they used it exclusively for celebrating Republican victories.

Judge Jett, the keeper of the Confederate records, has been getting information about this gun for some time, and it is probable that it will eventually become a part of the State Museum and be placed in the care of the State Historical Society for safe-keeping, so that Kentuckians who visit Frankfort may see it.

Judge Jett has been busy engaged for several months getting the roster of the company that had charge of the battery, and has been successful in learning a number of the names. He finds that they have been scattered to almost every State in the Union, as some of them have been located as far West as Colorado.

This was one of the most noted batteries in the Confederacy, having done excellent work on the battlefield in the Tennessee campaigns.—Maysville Bulletin.

AMERICAN MAY BUY THE POOLED TOBACCO

Officials of Burley Society in Conference With the Trust Representatives.

The Lexington Herald of Saturday publishes the following Louisville dispatch:

LOUISVILLE, Ky., Nov. 13.—Conferees between President Clarence LeBus and the Executive Committee of the Burley Tobacco Society on the one hand and R. K. Smith, John Middleton and Henry Walker on the other, have been in progress here with a view to the purchase by the company of a large portion of the 80,000,000 pounds of tobacco now in the White Burley pool.

Conferees Over For Present. The conferees ended for the time being this afternoon, and the members of the conference left for their respective homes. It is likely that the conferees will be resumed in a few days, and that the deal will go through.

Information tonight is that the deal would have been closed today but that there was some little dissatisfaction shown among some of the Executive Committee of the Burley Society. It is understood that the representatives of the American Tobacco Company offered the Burley Society people an average per pound of 15 cents for 60 per cent of the entire pool, which would have amounted to over forty million pounds, or over \$7,000,000 in cash. It is considered practically certain here that the deal will be consummated when the conference is renewed.

Does Not Desire to Sell All. The Burley Society wants to dispose of its holdings now in the pool, and it is learned that the American Tobacco Company, although denying responsibility for the present conditions in Kentucky, has expressed a genuine desire to do whatever it can toward restoring law and order in the State and satisfying the growers in the pool by paying them the exact market price for their tobacco, or for at least 60 per cent of it.

The American Tobacco Company holds that there are other manufacturing concerns, but the American is ready and willing to buy 60 per cent of the entire holdings of the Burley pool, and pay for it in cash.

The Burley Society does not care to dispose of all its holdings to the American Company, but is trying to find a sale for the biggest part of its holdings.

It is learned that last night the Burley Society through its officers gave notice to the American Tobacco Company that it had 80,000,000 pounds of white burley now in the pool.

The company stands ready to buy 48,000,000 pounds of the white burley, if not more. The market reports show that the average price of white burley is now \$15 per hundred pounds. Some of it has been selling as high as \$18 and \$20 a hundred, while some grades have sold down to \$10 and \$11.

Would Bring Over \$7,000,000. Therefore, at this time the American is ready to buy 48,000,000 pounds at an average price of \$15 a hundred pounds, which would bring into Kentucky for distribution among the tobacco growers \$7,200,000.

It is known that the tobacco growers came to Louisville with the hope of closing the deal and it is likewise known that the American Tobacco Company is perfectly willing "to trade" with the pool.

"Our position is just the same as it has always been," said an American Tobacco official. "We are willing to trade and do the fair thing. We want to do it now, and if this deal does not go through it will not be because we have not met the growers half-way and tried to give them a good price for their tobacco."

"We want to show our desire and willingness to do our part toward bringing about normal conditions."

THE MARKETS

CATTLE ACTIVE AND CALVES ARE LOWER.

CINCINNATI, O., Nov. 13.—Receipts and shipments of live stock at the Cincinnati Union Stockyards today were:

Cattle Hogs Sheep
Receipts 851 5414 824

NEW HOUSE AND BUILDING LOTS

Two building lots on Kentucky street were sold this week by Mr. Jonas Bush for \$300 each, one to Mr. D. H. Watts, and the other to Mr. Jeff Jones.

Mr. Clarence Ogden has near completion a beautiful cottage on Holly avenue.

Mr. Tom Hall of Hill street is building a residence on the same lot where his house was recently destroyed by fire.

Be sure to attend the fur opening Monday, November 16th at The Curry Dry Goods Co. 11-1321

G. L. WAINSCOTT

This cut of Mr. Waincott appeared in "The Southern Carbonator and Bottler" the leading trade journal of the kind in the South, published in Atlanta with a complimentary notice of Mr. Waincott, as being one of the successful bottlers of Kentucky. It had much to say about the new drink, "Roxa Kola" that his firm is putting out, it not only having become very popular in this immediate vicinity, but is being sought after in other States. The demand become so great that it is necessary for an increase in the capacity of the present plant, which will for next season be more than doubled, and it is very doubtful if the quarters will

be large enough then, plans having already been made for a much larger building which will no doubt be put into practice, and pushed to completion sometime during next summer.

Roxa Kola will then be put out, not only as it has the past season, but will be sold in syrup, and extract form, as is now being done in a small way. This will increase the territory for the business, as the syrup and extract can be shipped to any part of the country, as it will then not be necessary to have the containers returned, as is now the case when sold in the small bottles.

Thanksgiving will be here Soon

and all of us are getting ready to Eat the Festive Turkey.

The Housewife is beginning to take stock of her

LIME WILL NOT COOK TURKEY

but unless it is of good quality it will cook the goose of the man who wants to make a good job of building or repairing. If you have work of that kind planned better come here for your building materials like other wise builders. Better be sure at the start than sorry afterwards.

The WINN-MARTIN COAL & SUPPLY CO. INCORPORATED.

"RAILROAD JACK."

Railroad Jack visited the City School, Friday afternoon and made a very interesting talk to the pupils of the upper grades.

The general tenor of the talk was good and much enjoyed by those who heard the speaker. "Jack's" plea for temperance and a clean life, and his spirit of optimism were greatly appreciated by the pupils of the City School.

WINCHESTER ROLLER MILLS.

The oldest and best institution in the county is the Winchester Roller Mills. Why not use home flour—the best made. Kerr Perfection and White Pearl flour has no equal.

Now Is the Time.

As this is an off year, we are not over run with work. Although we are able to furnish our help 10 hours work a day every day in the week. We wish you would bring your work to us now while we can easily take care of it at less cost to ourselves and customers. Do not wait until times get good and we are very busy, for then you will have to pay more and wait longer for your work.

The above is especially directed to the Agriculturalist and is applicable to Manufacturers who are waiting for the good times that are sure to come soon after the holidays.

Do not put it off because it is small. We do not like small jobs when we are busy. You know how that is yourself.

Remember you do not have to go to Cincinnati or Louisville for Drawings, Blue Prints or Specifications, Wood or Metal Patterns, Gray Iron, Steel, Semi-Steel, Brass, Bronze, Aluminum and White Metal Castings.

We are agents for Structural Steel of all shapes and sizes.
